Proposal for Special Session in ICIITCEE 2023

Title of the special session: **Blockchain Technology and Artificial Intelligence**

(All engineering and Management domains)

Proposer of the special session:

- **Supriya Lamba Sahdev, ISBR Business School, Bengaluru, India,**
- **Dr. Chitra Krishnan, Amity International Business School, Amity University, Uttar Pradesh, India,**

Objectives of the special session:

In recent years, two highly discussed issues and technologies have been artificial intelligence (AI) and blockchain technology. AI can support Blockchain management in a more effective manner. Blockchain may be used to track, comprehend, and analyze AI choices in the meantime.

The session seeks to display the most recent findings and research from academics (professors, Ph.D. candidates, and post-doc scientists) in the fields of artificial intelligence (AI) and blockchain technology.

Delegates from various fields will have the chance to interact face-to-face while at this conference in order to create commercial or research relationships and locate international partners for future collaboration. We hope that the conference results in significant contributions to the knowledge base in these scientific fields.

Track /Sub-themes: Special session will cover the most recent advancements in blockchain and artificial intelligence research. Leading scientists, engineers, and researchers in the field will attend the conference from all over the world. Submission topics that might be of interest include, but are not limited to:

- Artificial intelligence in blockchain
- Cross-cultural management in the digital age

- Global business trade and Block Chain and technology
- The use of AI and machine learning, and IOT in organizations
- Global Trade: Innovation and Disruptions
- Integration of Blockchain and AI
- Artificial Intelligence and Blockchain Integration in Business
- Artificial Intelligence & Blockchain Technology for Smart Business Management
- Artificial Intelligence and Machine Learning in Global Trade Mobile payments used for business purposes in Emerging Economies
- Internet marketing in international business
- Evaluation of e-commerce readiness
- Development of e-commerce strategies
- Data mining strategies for global business
- Cross-border facilitation of right trade through ICT infrastructure and services
- Blockchain and Deep Learning: Future of AI
- Blockchain and AI in Finance
- How AI and Blockchain are transforming the Supply Chain
- How AI and Blockchain will influence the future of human labor in supply chains
- Artificial Intelligence modeling and simulations
- Blockchain for Securing AI Applications and Open Innovations
- Innovation in banking: fusion of artificial intelligence and blockchain
- Fuzzy Logic
- Smart Cities
- New Age Technologies
- International Trade: Opportunities and Risks Trading services through digital platforms
- Data Analysis in Global Trade
- The Role of Blockchain in Global Trade
- The Impact of 3D Printing on Global Trade
